## 1. General

---

In the autumn of 2016, a working group, consisting of TBVs and IDM, reworked the keywords for POIs and Activities. The changes have now been added to the system. The changes are described in detail below.

In the next steps, some adjustments are made, which have no influence on the interfaces. Users who use the Activity/POI interface must check whether any adjustments are necessary.

The configuration of the POIfinder will be adapted by the LTS to the new keywords over the coming days.

The translations of the English and Italian keywords will be reviewed by a translation office in the next few days and adapted as necessary. The order of the keywords for the selection in the TIC-Web Backend will be adapted after the translations have been completed.

### 1.1. Nightlife and entertainment

On the suggestion of the working group ALL objects of the nightlife and entertainment group are removed from the POIs. In future these objects will be maintained only in Gastronomy.

We ask the tourism associations to check whether the objects have already been recorded in Gastronomy. If the objects do not exist, they must be created there manually. The objects in the area of nightlife and entertainment will be deleted from 01.07.2017. In future there will not be any nightlife and entertainment in the POIs.

List of POIs listed under nightlife and entertainment (04.05.2017): ... see Attachment B - List of POIs: Nightlife and Entertainment

### 1.2. Area „Forts, Castles, Ruins“

The area "Forts, Castles, Ruins" will be deleted with 01.07.2017. The interface must be adapted. The affected objects must be assigned to the correct keywords. Corresponding keywords have been created.

List of POIs with area (04.05.2017): ... see Attachment A – POIs from Area: Forts, Castles, Ruins

### 1.3. Listing of changes:
